JOURNAL OF ELECTROANALYTICAL CHEMISTRY AND INTERFACIAL ELECTROCHEMISTRY, VOLUME 220 (1987)

SUBJECT INDEX

Benzotriazole,
spectroelectrochemical study of the corrosion of a copper electrode in deaerated 1.0 *M* HCl solutions containing Fe(III). Effect of the corrosion inhibitor ——— (Da Costa et al.) 259

Bromophenol blue,
ion transfer of ——— across liquid–liquid interfaces (Wang, Sun) 235

n-Cadmium telluride,
recombination and charge transfer at the illuminated ———/electrolyte interface. Simplified kinetic model (Lincot, Vedel) 179

Carbon dioxide,
electrocatalytic reduction of ——— to methanol. Part VIII. Photoassisted electrolysis and electrochemical photocell with n-TiO_2 electrode (Ogura, Uchida) 333

Chromium,
electrochemical and surface science investigations of PtCr ——— alloy electrodes (Paffett et al.) 269

Copper,
spectroelectrochemical study of the corrosion of a ——— electrode in deaerated 1.0 *M* HCl solutions containing Fe(III). Effect of the corrosion inhibitor benzotriazole (Da Costa et al.) 259

Cyanopyridines,
surface-enhanced Raman scattering (SERS) on silver electrodes as a technical tool in the study of the electrochemical reduction of ——— and in quantitative analysis (Rubim) 339

Cyanopyridinium,
electroreduction of 2- and 3- ——— ions (Schwarz et al.) 139

Cyanoruthenate,
polynuclear mixed-valent ruthenium oxide/——— composite that yields thin coatings on a glassy carbon electrode with high catalytic activity toward methanol oxidation (Kulesza) 295

Dicobalt cofacial porphyrin,
redox behaviour of the ——— Co_2FTF4 and related complexes adsorbed on graphite electrodes (Ngameni et al.) 247

Diffusion layer imaging,
spectroelectrochemical determination of trace concentrations by ——— (Jan, McCreery) 41

DNA,
sodium responsive tungsten bronze electrode. An electrode for sodium ion analysis of ——— solutions (Dobson, Comer) 225

Epipodophyllotoxin,
electrochemistry of podophyllotoxin derivatives. Part II. Oxidation of tenisposide and some ——— derivatives (Holthuis et al.) 101

Ethyl 3-oxo-3-phenyl-2-phenylhydrazonopropionate,
electrochemical oxidation of ——— (Goyal et al.) 311

Father–son reaction,
kinetic analysis of a slow electron transfer coupled with a ——— (Arévalo et al.) 201

Galerkin/B-spline (GBS) numerical model,
global finite element ——— of electrochemical kinetics, transport, and mechanism for multi-geometry working electrodes. Part I. Modeled Nernstian voltammetry (Stephens, Moorhead) 1

Glassy carbon,
oxygen reduction on ——— in 0.1 *M* HCl: RDE and XPS study (Sundberg et al.) 161
Polynuclear mixed-valent rutheniumoxide/cyanoruthenate composite that yields thin coatings on a ——— electrode with high catalytic activity toward methanol oxidation (Kulesza) 295
Gold,
modification of the last step of surface preparation for ——— and silver single srystal faces (Hamelin et al.) 155
Nucleation and growth of polythiopene films on ——— electrodes (Hillman, Mallen) 351
Graphite,
redox behaviour of the dicobalt cofacial porphyrin Co_2FTF4 and related complexes adsorbed on ——— electrodes (Ngameni et al.) 247

Hydrochloric acid,
oxygen reduction on glassy carbon in 0.1 *M* ———: RDE and XPS study (Sundberg et al.) 161
Spectroelectrochemical study of the corrosion of a copper electrode in deaerated 1.0 *M* ——— solutions containing Fe(III). Effect of the corrosion inhibitor benzotriazole (Da Costa et al.) 259
Hydroquinone,
catalysis of quinone– ——— redox reactions at polypyrrole benzenesulphonate-coated platinum electrodes (Haimerl, Merz) 55
Hydrous oxide,
model for anodic ——— growth at iridium (Pickup, Birss) 83
7-Hydroxymethotrexate,
electrochemistry of methotrexate and its metabolites. Part II. Reduction of ——— (Gurira, Bowers) 323

Ionic solvation,
——— at the solid/electrolyte interface: a statistical-mechanical approach (Russier et al.) 213
Iridium,
model for anodic hydrous oxide growth at ——— (Pickup, Birss) 83
Iron(III),
spectroelectrochemical study of the corrosion of a copper electrode in deaerated 1.0 *M* HCl solutions containing ———. Effect of the corrosion inhibitor benzotriazole (Da Costa et al.) 259

Low-conductivity systems,
voltammetric measurements with microelectrodes in ——— (Peña et al.) 31

Methanol,
electrocatalytic reduction of CO_2 to ———. Part VIII. Photoassisted electrolysis and electrochemical photocell with n-TiO_2 electrode (Ogura, Uchida) 333
Polynuclear mixed-valent ruthenium oxide/cyanoruthenate composite that yields thin coatings on a glassy carbon electrode with high catalytic activity toward ——— oxidation (Kulesza) 295
Methotrexate,
electrochemistry of ——— and its metabolites. Part II. Reduction of 7-Hydroxymethotrexate (Gurira, Bowers) 323
Microelectrodes,
voltammetric measurements with ——— in low-conductivity systems (Peña et al.) 31
Multi-geometry working electrodes,
global finite element Galerkin/B-spline (GBS) numerical model of electrochemical kinetics, transport, and mechanism for ———. Part I. Modeled Nernstian voltammetry (Stephens, Moorhead) 1

Nucleation rings,
——— around a growing crystal (Adzic et al.) 169

Oxygen,
efficient and stable ——— evolution on zirconium nitride thin film electrodes prepared by the reactive RF sputtering technique (Azuma et al.) 369
——— reduction on glassy carbon in 0.1 *M* HCl: RDE and XPS study (Sundberg et al.) 161

Platinum,
catalysis of quinone–hydroquinone redox reactions at polypyrrole benzenesulphonate-coated ——— electrodes (Haimerl, Merz) 55
Electrochemical and surface science investigations of PtCr alloy electrodes (Paffett et al.) 269

Electrochemical oxidation of HCOONa on ——— in acidic solutions (Kita et al.) 125
Podophyllotoxin,
electrochemistry of ——— derivatives. Part II. Oxidation of teniposide and some epipodophyllotoxin derivatives (Holthuis et al.) 101
Polyaniline,
spectroelectrochemical study of ——— versus potential in the equilibrium state (Genies, Lapkowski) 67
Polydiphenylamine,
electrochemical synthesis and study of ——— (Hayat et al.) 287
Polypyrrole benzenesulphonate,
catalysis of quinone–hydroquinone redox reactions at ———-coated platinum electrodes (Haimerl, Merz) 55
Polythiophene,
nucleation and growth of ——— films on gold electrodes (Hillman, Mallen) 351
Porphyrin,
redox behaviour of the dicobalt cofacial ——— Co_2FTF4 and related complexes adsorbed on graphite electrodes (Ngameni et al.) 247
Propane,
current doubling during ——— oxidation on the n-TiO_2 anode in trifluoromethanesulphonic acid monohydrate (Harima, Morrison) 173

Quinone,
catalysis of ———–hydroquinone redox reactions at polypyrrole benzenesulphonate-coated platinum electrodes (Haimerl, Merz) 55

Ruthenium oxide,
polynuclear mixed-valent ———/cyanoruthenate composite that yields thin coatings on à glassy carbon electrode with high catalytic activity toward methanol oxidation (Kulesza) 295

Silver,
modification of the last step of surface preparation for gold and ——— single crystal faces (Hamelin et al.) 155
Surface-enhanced Raman scattering (SERS) on ——— electrodes as a technical tool in the study of the electrochemical reduction of cyanopyridines and in quantitative analysis (Rubim) 339
Sodium,
——— responsive tungsten bronze electrode. An electrode for sodium ion analysis of DNA solutions (Dobson, Comer) 225
Sodium formate,
electrochemical oxidation of ——— on Pt in acidic solutions (Kita et al.) 125
Surface preparation,
modification of the last step of ——— for gold and silver single crystal faces (Hamelin et al.) 155

Teniposide,
electrochemistry of podophyllotoxin derivatives. Part II. Oxidation of ——— and some epipodophyllotoxin derivatives (Holthuis et al.) 101
n-Titanium dioxide,
current doubling during propane oxidation on the ——— anode in trifluoromethanesulphonic acid monohydrate (Harima, Morrison) 173
Electrocatalytic reductions of CO_2 to methanol. Part VIII. Photoassisted electrolysis and electrochemical photocell with ——— electrode (Ogurka, Uchida) 333
Trifluoromethanesulphonic acid monohydrate,
current doubling during propane oxidation on the n-TiO_2 anode in ——— (Harima, Morrison) 173
Tungsten bronze,
sodium responsive ——— electrode. An electrode for sodium ion analysis of DNA solutions (Dobson, Comer) 225

Zirconium nitride,
efficient and stable oxygen evolution on ——— thin film electrodes prepared by the reactive RF sputtering technique (Azuma et al.) 369
